- Vehicle Mitigation Barrier Policy
  - To ensure pedestrian safety and prevent unauthorized vehicle access, event organizers must implement vehicle mitigation measures at vulnerable locations identified by Campus Safety Services, Environmental Health and Safety, Parking & Transportation Services, University Operations and Risk Management. These include the use of bicycle barricades, cones, and signage to block vehicle entry while maintaining clear fire lanes and emergency evacuation routes. All barriers must be easily movable by emergency personnel. Organizers are required to coordinate barrier setup with Parking & Transportation Services during event planning.
