

# Santa Clara University Immunization Requirements

Required Immunizations & Screenings	Required Dosage & Screening Information
<a href="#"><u>Measles, Mumps and Rubella (MMR)</u></a> (Consistent with all schools researched)	Two (2) doses with first dose on or after 1 <sup>st</sup> birthday; OR positive titer (laboratory evidence of blood test showing positive immunity to all three diseases).
<a href="#"><u>Varicella (Chickenpox)</u></a> (Consistent with most schools researched)	Two (2) doses with first dose on or after 1st birthday; OR positive titer (laboratory evidence of blood test showing positive immunity to all three diseases).
<a href="#"><u>Tetanus, Diphtheria and Pertussis (Tdap)</u></a> (Consistent with most schools researched)	One (1) dose after age 7. Booster required within the past 10 years. The booster should contain the pertussis component (Tdap NOT Td).
<a href="#"><u>Hepatitis B vaccine (Hep B)</u></a> (Consistent with most schools researched)	Series of 3 doses OR titer result (blood test) showing positive immunity.
<a href="#"><u>Meningococcal conjugate (Meningitis)</u></a> <a href="#"><u>Menactra or Menveo</u></a> (Consistent with Cal Poly - SLO and research regarding college age students residing in dormitory style living.)	One dose given after the age of 16. Not required if over 21 years of age.
<a href="#"><u>Meningococcal B - Bexsero or Trumenba</u></a> (Consistent with research regarding college age students residing in dormitory style living.)	Required for on-campus living.
<a href="#"><u>Tuberculosis Screening (Blood Test): Tspot or Quantiferon Gold</u></a> – for students coming from other countries	Students must submit a Tspot or Quantiferon Gold lab test result as soon as possible; but definitely within your first quarter at SCU. <ul style="list-style-type: none"> <li>• This is a lab test that must be completed at a lab within the United States.</li> <li>• Students from countries labeled as “High TB Burden” countries by the World Health Organization (WHO) are <u>required</u> to have TB screening.</li> <li>• <a href="#"><u>Review the complete list of exempted and required screening countries.</u></a></li> <li>• Students from countries of origin that are not “High TB Burden” as designated by the World Health Organization may be exempt.</li> </ul>
<b>TB Screening (PPD Skin Test):</b>	Tuberculosis Screening (PPD Skin Test) is not a vaccine; yet it is often required when volunteering with the SCU Arrupe Center or community agencies and/or for employment.  Some facilities may require a blood test for TB screening, Tspot or Quantiferon Gold. Quantiferon Gold is available in the Cowell Center at Student Health Services.
